Libraries & DH: Histories, Perspectives, Prospects Mini-Conference (SIG)

Layne-Worthey, Glen

Galina, Isabel

Høsøien, Hege

Potvin, Sarah

Christian-Lamb, Caitlin

Eichmann-Kalwara, Nickoal

Wermer-Colan, Alex

Lach, Pamella

Richardson, Hilary

Co-sponsored by the ADHO "Libraries & DH" Special Interest Group (celebrating 10 years of existence), *dh+lib* (celebrating over 12 years of publication), the ACH "DH in Libraries" Working Group (celebrating and reporting on its first year), and the US-based "Data Speculations National Forum on Library Digital Stewardship for Copyrighted Contemporary Culture," this full-day event will consist of presentations, roundtables, and discussions of the history and current state of our shared interdisciplinary community of practice.

Topics of special concern will include research with in-copyright or otherwise restricted data; the promise and perils of large language models and other AI-enabled approaches and their impact on libraries; the recent sunsetting of some of the research infrastructures supporting our areas of work; and the organizational and cultural structures underpinning our shared profession.
